Experience

IT Intern – Chemours, Pigment Plant

New Johnsonville, TN

Summer 2022 – Summer 2024

Documented, tracked, and updated a wide array of company devices using Microsoft **Intune** and custom **PowerApps**

Deployed and managed devices using Windows **Autopilot**; performed manual system wipes as needed

Software Developer – Navita MSP

December 2025 – Current

Built a pipeline using **Airbyte** and **N8n** from multiple sources and set up the destination database to fuel a **PowerBI** Dashboard which I built after

Created **Next.js** website for the company and the CRM tool that connects to the leads produced. **CRM** was made using **Asana** for the ui and **N8n** for the functionality

Currently working in a **.Net** application built with clean architecture. It was built and is updated in Azure **DevOps** and the pipeline in Azure **Data Factory**
